## PRODUCT RANGE

There are 4 different models in the Clean Feet Product Range:

### **Model 1: Clean Feet Standard**

This Model has no water supply and with the use of brushes cleans dirt from the soles and sides of footwear.

### **Model 2: Clean Feet Pro**

This Model has brushes and a water supply to enable the washing and cleaning of footwear.

### **Model 3: Clean Feet Deluxe**

This Model has a water supply and a chemical mixing valve to enable the washing, cleaning and disinfecting of footwear.

### **Model 4: Clean Feet Deluxe Pro**

This Model is fitted with brushes, has a water supply and chemical mixing valve and an auxiliary port with nozzle or brush attachments depending on use. This auxiliary application can be used for the cleaning/disinfecting of tyres, wheelbarrows, buckets etc that need to enter the clean environment.

## WHY CLEAN FEET DELUXE & DELUXE PRO MODELS?

The advantages of using the Clean Feet Deluxe and Clean Feet Deluxe Pro Models are:

- Use of clean, uncontaminated water at all times;
- No air borne pollutants, no further dilution of chemicals (i.e. rain, wind etc);
- No animal waste (i.e. bird droppings);
- Precise amounts of chemicals used;
- More cost effective;
- More environmentally friendly.

All of the Clean Feet Models are fitted with pvc food grade brushes and are equipped with wheels for ease of movement (i.e. different locations) and storage especially in times of bad weather.
